|                                                                                                                                                                       | Answer                                                                                                                                                                                                                                                                                                                                                                       |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1) is the provided lab space airconditioned? Heated?                                                                                                                  | yes.                                                                                                                                                                                                                                                                                                                                                                         |
| 2) is there lab space to perform soils testing. Is it a controlled environment?                                                                                       | Yes. He "dirty" lab is a "Conex" provided for this purpose, but is not a controlled environment.                                                                                                                                                                                                                                                                             |
| 3) ASTM D6307 Does "owner" provide calibration materials or services?                                                                                                 | No. these are provided by CQC contractor, either onsite or as offsite testing.                                                                                                                                                                                                                                                                                               |
| 4) Are ALL the tests to be performed specifically listed in the bid documents?                                                                                        | No. The list of tests in the SOW is not all inclusive.                                                                                                                                                                                                                                                                                                                       |
| 5) Is ASTM D7928, using Sodium Sulfate or Magnesium Sulfate a required test.?                                                                                         | Yes                                                                                                                                                                                                                                                                                                                                                                          |
| 6) the bid documents require an Operation Manual to be submitted with the proposal.<br>Is this the same as the QA Program ?                                           | No. The QA Program is a required submittal after award. It is not the same document.                                                                                                                                                                                                                                                                                         |
| 7) What are the specific tests that will be performed in the Impacted materials laboratory? Can the type of contamination expected in the impacted samples be stated? | The compaction requirements are included in the OSWDF O&M Plan, specifically in Appendix B, OSWDF Impacted Material Placement Plan. The OSWDF O&M Plan is listed in Section 2.4 Exhibit 3 and is included in the RFP and available on SOCCo Working with US, Solicitations. (The potential contaminants and levels would be available from SOCCo Rad Pro or Rad Engineering. |
| 8) A bidder noted a discontinued test (ASTM) was in the SOW. And asked if it has been replaced.                                                                       | Yes, the SOW list of tests is not all inclusive.                                                                                                                                                                                                                                                                                                                             |

**Commercial**

|                                                                                                        |                                                                                                        |
|--------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| 1) Is a small business plan required to be submitted?                                                  | Yes                                                                                                    |
| 2) The contract references a "labor agreement". Is the bidder required to be bound by the labor agreem | No, See the Service Contract ACT                                                                       |
| 3)The Service Contract ACT applies. Wage Determination 2015-4771, R-32 dated 5/13/26.                  |                                                                                                        |
| 4)Does the Earned Value Management System apply to this contract?                                      | No, the total value is less than the threshold.                                                        |
| 5) The "Truth in Negotiations Act: (Certified Pricing) Does this apply and what are the FAR clauses?   | The FAR Clauses are 52.215-12 and 52.215-13. It cannot be determined at this time if these will apply. |
| 6) "Organizational Conflict of Interest" How is that disclosed?                                        | See the Reps and Certs Document (with the bid files) for the disclosure statement.                     |
| 7) Please provide a spreadsheet to list the pricing for all classifications and years of performance.  | An Excel spreadsheet is provide with this response.                                                    |
